Trailer Clips I/O Motor Support

These trailering clips provide an inexpensive way to protect stern drive units while trailering or storing. They relieve the stress on the tilt and trim system by transferring the stern drive weight from the hydraulic cylinders to the transom bracket. These clips will prevent damage from weight surges during trailering. Fits all Mercruiser Alpha 1, Alpha 1 Generation II, Bravo 1, Bravo II, Bravo III, and Blackhawk Stern Drives. Units may be trimmed to for shorter rams.

T-Rex® Transom Saver with Prop Lock

Protect your boat transom and deter theft of your propeller and transom saver with the T-Rex®. This worldwide product utilizes the traditional design of a transom saver while incorporating a prop lock. T-Rex® expands from 29"-51" covering more applications than other transom savers.

DRS TR1	\$66.67

Does not "tie" the boat's outboard to the trailer, which in some cases can cause "trailer shock" when the boat and trailer get out-of-sync. This is a small compact unit that totally locks the outboard in the forward position without tying it to the trailer. And its small size makes it easy to store in your boot when not in use. Black powder coated finish.
