Global Fix 406 MHz EPIRB with Integral GPS Category II

- Internal GPS engine allows faster 406 EPIRB location than standard, non-GPS-enabled models; can update position every 20 minutes
- New GPS engine provides faster acquisition time
- EPIRB has circuitry, battery voltage and GPS acquisition test features built in, or can be fully tested at a BRC
- Patented proprietary electronics package for faster, more stable 406 frequency transmission
- Field programmable at BRC equipped with FPR-100, FPR-10
- 48 hours operating life at -40° C (-40° F), allowing for monthly self-test for 5 years
- Lanyard coil retained with all around cover for non-tangling deployment
- Mounting bracket included with EPIRB purchase
- Transmits on 406 MHz (COSPAS-SARSAT) with your registered, unique, digitally-coded distress signal, and 121.5 MHz (SAR homing frequency)
- Built-in strobe for enhanced location in poor visibility conditions
- Single, three-position switch for easy test of battery, EPIRB and GPS operation. Steady green LED indicates unit has passed full functional EPIRB test. Flashing red LED indicates unit is "ON"
- Can be manually activated; self-buoyant – no external float collar to lose
- High impact plastic case designed to withstand exposure to UV rays, oil, sea water and raft packing
- 5 year limited warranty
- 5 year replacement life lithium battery
